Bipolar cup with removable ring

quality for health

phAro

PHARO is a bipolar cup with a removable ring that provides the simplified adaptation of a femoral stem with a 28 mm head. This implant is part of PHARO intermediary prosthesis program.

ADVANTAGES :

The removable ring system offers an easy setting of the mobile cup with the help of a Kelly type forceps.

Thanks to this device, trials of neck lengths can directly be made with

the PHARO bipolar cup.

The cup is used with a standard 28 mm head.

The cup can be set without acetabular reaming.

The PHARO bipolar cup can easily be removed.
